

Building Communities Against Sexual Violence

With data from the National Institute of Justice showing that one in five college women (and one in 16 men) will experience some form of non-consensual sexual activity by graduation, the widespread impact of sexual violence on students presents an urgent and pressing challenge for our nation's campuses.

Colleges across the U.S. are facing increasing scrutiny over their efforts to promote student safety as well as their handling of reports of sexual violence. The federal government has taken unprecedented action to ramp up regulations around prevention and response and to hold schools accountable for protecting and supporting students. Leading institutions are increasingly committing to best practice approaches to address these challenging issues.

Haven is EverFi's premier online learning program addressing the critical issues of sexual assault, relationship violence, and stalking, which impact countless college students across the country. Built in collaboration with leading researchers and practitioners, *Haven* is an interactive course designed to engage and empower students to create safe, healthy campus environments.

Promoting Student Wellness

Haven combines the power of cutting-edge instructional design and rich media to educate students about the elements of healthy relationships, the importance of sexual consent, and the role of bystanders in creating safe, healthy communities. The one-hour curriculum helps meet and exceed federal prevention education requirements outlined by the recent amendments to the Clery Act, commonly known as the Campus Sexual Violence Elimination (SaVE) Act.

75%

OF CAMPUS SEXUAL ASSAULTS

EVERFI.COM

EverFi's Higher Education digital learning platform provides comprehensive and effective solutions to the critical 'wellness' issues that fundamentally impact students throughout college and beyond.

Building Student Engagement to Create Campus Change

Haven uses a population-level approach to educate students on the issues associated with sexual assault, sexual harassment, and relationship violence, taking into account their unique perspectives and experiences.

A Focus on Relationships

In *Haven*, students are encouraged to reflect on personal values and expectations in relationships as a foundation for personal engagement. The program's primary focus is to promote healthy relationships based on positive communication and respect. *Haven* demonstrates for students the warning signs of abuse as well as situations that may be challenging or confusing regarding consent.

Personal Connections

Haven uses language and scenarios that are inclusive of and sensitive to diverse identities and experiences to provide a relevant and engaging learning environment. By offering a range of perspectives, encouraging personal reflection, and drawing upon individual values and strengths to guide student engagement, *Haven* creates a powerful connection to these issues among students.

Real-Life Scenarios

Throughout *Haven*, rich and in-depth scenarios serve to model healthy behaviors, increase awareness of opportunities to intervene, and provide a range of strategies for taking action. Additional scenarios encourage students to challenge sexist language and attitudes and provide guidance for supporting a friend who may be a victim of sexual assault or relationship violence.

Benefits to Your Institution

- Educate students on vital subjects via a concise, accessible, engaging, personalized (and private) online platform
- Mitigate institutional risk, liability, and negative reputational repercussions
- Protect and better serve students by helping to build safer communities
- Develop enhanced, targeted, and data-driven prevention programs

COURSE FEATURES

- Web Content Accessibility Guidelines (WCAG) 2.0 AA compliance
- Legal definitions of key terms by state
- Bystander skill- and confidence-building strategies
- Campus-specific policies, resources, and student involvement opportunities integrated throughout course
- Social norming interactivities programming
- Rich data summaries to inform future programming
