Financial Education Courses for High School

Survey results indicate that fewer than a third of high school juniors and seniors (30 percent) reported that they felt prepared to compare financial institutions and select one that best meets their needs. A similar share of students reported feeling unprepared to manage their credit over time.¹ Without a solid foundation of personal finance education, students can be left vulnerable to costly financial mistakes or missed opportunities as they transition to adulthood.

The EVERFI Financial Education Suite is designed to build financial capability and empower students to manage their financial goals and milestones through complementary courses covering topics like banking, saving, investing, employment, and income. It also supports the development of financial confidence and healthy financial habits. You can easily pair courses together to create a robust financial education curriculum.

Financial Education Courses for High School

“Longitudinal Study of Financial Capability Among Adolescents” (2022)

Courses: *FutureSmart* and *EVERFI: Financial Literacy*

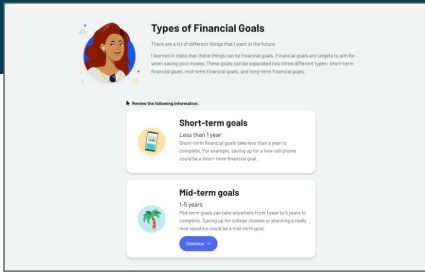

Prepare Your Students for Their Financial Future

I'm the first in my family to attend college right out of high school. I would have made numerous financial and budgeting blunders had it not been for EVERFI ... I discovered how to pay my taxes and open a bank account, which was extremely beneficial.

– High School Student, Michigan
