

FREE DIGITAL LESSONS

Ignition: Digital Wellness & Safety

As students navigate and connect with others in online spaces, they are met with an overwhelming amount of information of varying quality and intentions as well as threats to their privacy and security. Nearly half (46%) of teens say they are online almost constantly; this number has roughly doubled since 2014-15.¹

Ignition: Digital Wellness & Safety is a free digital course that tackles some of the most pressing digital issues facing students today, preparing them to be better digital citizens over their lifetime. Through an interactive learning experience, students engage in true-to-life scenarios where they are encouraged to take practical steps to protect their balance between online and offline activity, their privacy and safety, while also teaching them how to evaluate content for accuracy, perspective, and motive.

Empower Students to Successfully and Safely Navigate the Digital World

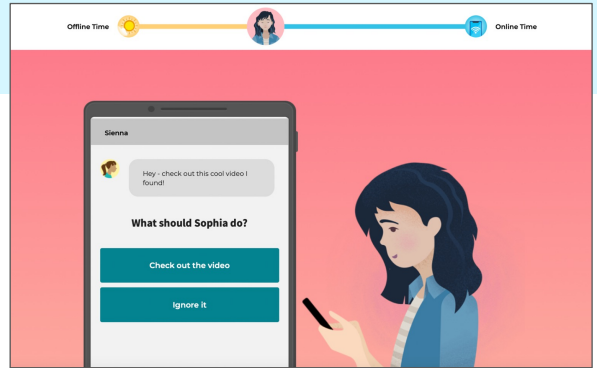

In one of my classes, we discussed a current event in the news about a girl who had experienced cyber bullying. Two of my students mentioned the *Ignition* lessons they completed. One girl said she learned to report those problems to an adult. I saw many heads in class nod. I knew they had paid attention to the information in those *Ignition* lessons.

– Middle School Teacher, Mississippi

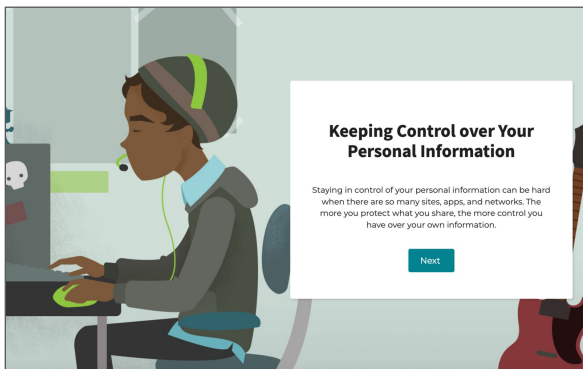

Safety and Privacy

Students learn what a digital footprint is, how to protect personal information, why to be wary of digital tracking, and how to get help when they need it.

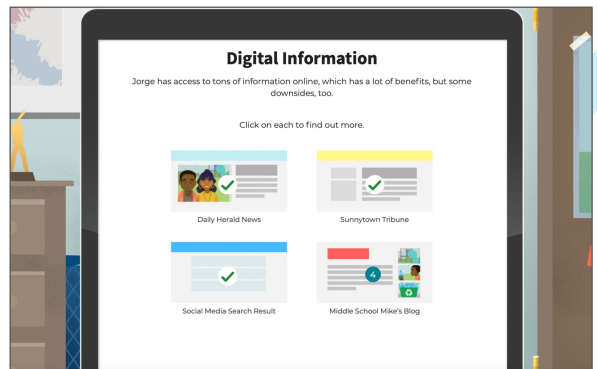

Screen Time vs. Offline Time

Students learn the benefits and risks of online time, as well as ways to identify if they spend too much time online and how to manage their online time.

Technology and Data

Students learn how to protect their data online, how to recognize and avoid online threats, and how to create a secure password.

Evaluating Content

Students learn how to conduct effective searches online, how to evaluate content for accuracy, and how to differentiate news from native ads.
