

LIBRARY OF FREE DIGITAL COURSES

# Digital Career Readiness Courses

The U.S. Department of Education found that students who focused on career and technical education (CTE) courses while in high school had higher annual earnings than students who did not.<sup>1</sup> In particular, STEM subjects are critical disciplines for students as the demand for careers in STEM only continues to rise. Middle schools and high school CTE programs provide an essential opportunity to engage and prepare the next generation for rewarding careers.

EVERFI offers a library of complementary digital courses designed to promote 21<sup>st</sup> century skills and college & career readiness. You can easily pair courses together to provide a more comprehensive experience for your CTE students – preparing them for the jobs of tomorrow. All 10 digital courses are research-based and aligned to various standards including Jump\$tart, CTE, CCTC, and ISTE.
