

FREE DIGITAL SIMULATIONS

Tax Simulations for High School Students

High school is a critical period to prepare students for their financial futures with many students starting their first job during this period or shortly thereafter. Navigating tax season for the first time can be a source of anxiety, yet taxes are not commonly taught in the classroom.

EVERFI offers free, standards-aligned tax simulations, sponsored by Intuit for Education, to help students develop healthy financial habits and build confidence about handling their taxes. The tax simulations exist within the digital course *EVERFI: Financial Literacy*, a free financial education 101-course that teaches high school students how to make wise financial decisions to promote financial well-being over their lifetime. Through real-world scenarios, learners navigate preparing and filing taxes for five characters. The tax curriculum introduces important tax considerations that are relevant to high school students.

Tax Simulations for High School Students

GRADE LEVEL:
9-12
